CAREER SUMMARY

I am a dedicated full-stack developer focusing mainly on front-end technologies, and I will finish my Bachelor of Science in Computer Science in a month. With hands-on experience in React, TypeScript, FastAPI, and Node.js, I've worked professionally for a company - "ChiefSoft Works" and various clients, delivering dynamic web applications. My passion lies in creating user-friendly interfaces and efficient backend solutions. I am eager to join a forward-thinking company and leverage my skills to drive impactful projects and continuous innovation.

EDUCATION AND LEARNING EXPERIENCE

Bachelor of Science, Computer Science (IN-VIEW)

Nov. 2022 – Aug. 2024

Coal City University | Enugu State/Nigeria

In school, I learned about system architecture and SDLC and built desktop applications using VB.Net, including a calculator. Alongside my studies, I embraced leadership roles, serving as academic director, advising the student union president for computer science, and organizing vibrant departmental social events. My final year culminated in an exciting project: developing recognition software for security systems using Python, blending my technical skills with real-world applications.

HacathonAfrica Bootcamp (Intern)

Sept. 2022 – Nov. 2022

Africa Plan Foundation | Enugu State/Nigeria

During this time, I mastered the MERN stack and contributed to the development of three web projects that received an average user rating of 4.5/5. I also focused on building strong teamwork skills, which helped improve project efficiency. Working closely with colleagues, I assisted in creating prototypes for new web pages and features. Additionally, my efforts in fostering team cohesion led to the successful completion of two projects within deadlines and enhanced overall project quality. I also got awarded for being innovative.

PROFESSIONAL EXPERIENCE

Full Stack Developer,

03/2024 – Present

Freelance | Remote

I led the development of backend (FastAPI) and frontend (React, Tailwind) components for web applications, achieving significant performance boosts and faster server response times. I also gained foundational UI/UX knowledge, leading to increased user satisfaction and reduced web application bounce rates.

- I improved user satisfaction and reduced web application bounce rates through enhanced UI/UX design.
- I optimized the application codebase, leading to a reduction in bugs and a more maintainable and robust software architecture.

CHUKWUMDIEBUBE OJINTA | SOFTWARE DEVELOPER

Front End Developer,

03/2023 – 06/2023

ChiefSoft Works | Atlanta, GA/USA

I developed user-friendly web interfaces (landing pages and dashboards) using React, boosting user satisfaction and conversion rates. I managed states effectively with Hooks and state management libraries like Redux and Zustand. Integrated payment gateways (Flutterwave and Stripe), facilitating seamless transactions for users.

- Proudest achievement: I joint-spearheaded a project that improved overall application performance, resulting in faster load times and a smoother user experience.
- I participated in Docker containerization, ensuring consistent environments for development and deployment
- I ensured seamless functionality across multiple browsers, resolving cross-browser issues and enhancing the user experience.
- I maintained a high-quality, bug-free codebase, reducing reported bugs.

Accomplished Projects: · <http://www.wrenchboard.com>, <http://www.myfit.ai>, <https://users.wrenchboard.com>

RELATED SKILLS AND TECHNOLOGIES USED

- | | |
|-------------------------|------------|
| • JavaScript/TypeScript | • FastAPI |
| • React | • Postgres |
| • Next.Js | • MongoDB |
| • Express.Js | • Docker |
| • Python | • Firebase |

VOLUNTEER WORK

Mentor and Facilitator,

05/2023 – Present

Genesys Tech Hub (Upskill) | Enugu/Nigeria

- I successfully guided a cohort of 35 aspiring developers, providing continuous support and monitoring their progress until they became proficient in web development.
- My mentorship spanned from foundational web essentials to advanced topics such as React, state management, and prop drilling.

PROFESSIONAL CERTIFICATIONS AND TRAINING

Full Stack Web Developer | AfricaPlan Foundation and Utiva Academy
2022

Agile Expert Certificate of Proficiency | Jobberman Nigeria
2022

PROFESSIONAL AFFILIATIONS

Nigerian Association Of Computing Science Students
2023 - 2024
